Re: Lansdale Semiconductor Compliance with REACH Statement

REACH (Registration, Evaluation, Authorization and Restriction of Chemicals) is a European Union Commission (EUC) Regulation on chemicals and their safe use (EC 1907/2006) entered into force on 01 June, 2007 and will be phased in until 2018.

Lansdale supports the basic aim of REACH in improving the protection of human health and environment through the better and earlier identification of intrinsic properties of chemical substances. Lansdale meets all applicable REACH requirements and is committed to provide our customers with information about substances in its products as required.

Under REACH, registration of substances which are used in the manufacturing of articles do not apply to Lansdale's operations.

Lansdale Semiconductor's products are "articles" as defined in REACH Article 3(3) and do not release substances under their normal use. Suppliers of articles must provide recipients with information on Substances of Very High Concern (SVHC) if those are present above a concentration limit of 0.1% on an article level. Lansdale Semiconductor products do not contain any of the currently listed SVHC's. Lansdale will continue to work with our suppliers to ensure that all SVHC's are notified to the European Chemicals Agency, if necessary, to comply with the REACH requirement.

Lansdale assures it's customers that our products are in full compliance the the EU REACH requirement.

Lee Mathiesen
QA Manager
